There are networks around us all the time, such as telephone network, telegraph network, TV network, computer network, etc. Even in our body, there are many network systems, such as nervous system, digestive system and so on. The most typical representative is the computer network, which is the combination of the two fields of computer technology and communication technology. Universal Wiser Publisher [1] is pleased to announce the launch of a new journal—*Computer Networks and Communications* [2].

Computer Networks and Communications is an international, peer-reviewed, open access journal, published biannually online by Universal Wiser Publisher. The Journal is aimed to provide a digital forum for researchers and experts to publish research articles and review papers concerned with communications and networks related fields.

We would like to introduce Prof. Pascal Lorenz who accepted our invitation to serve as the Founding Editor-in-Chief of *Computer Networks and Communications*. Additionally, we also would like to extend a warm welcome to all of our Editorial Board Members. As with all of Universal Wiser Publisher's open access journals, we will maintain a fast and rigorous peer-review process for this new journal. We hope that you will enjoy publishing with us.

Conflict of interest

There is no conflict of interest for this study.
