Materials science is a rapidly growing area of study that covers many interdisciplinary fields. Around the world, increasing numbers of researchers are engaged in materials research. *Materials Plus* is dedicated to publish cutting-edge original papers integrating knowledge from all the fields of materials science and engineering. As an open access journal, *Materials Plus* provides a free and unlimited access to published papers, and should be of interest to anyone working on materials studies. The quality of the published articles will be assured by a rigorous peer-review process.

Universal Wiser Publisher (UWP) is a publisher of academic open access journals, which was founded in 2018 and is headquartered in Singapore. To further develop the publisher and open exchange for academic ideas and results, we are planning to launch a series of new journals, aiming at publishing high-quality papers.

The successful launch of *Materials Plus* has been made possible by the efforts of many people working as a team. With the help of these incredible Editorial Board members, we hope that *Materials Plus* will become a premier publication for materials research. We welcome you to *Materials Plus* and encourage you to submit original, high-quality research articles as well as comprehensive review articles to MP. Enjoy publishing with us!
