As the global warming, depletion of the fossil (oil and gas) and thinning of the ozone layer, “green” (environmentally-friendly) chemistry has become one of the most important segments in the chemical discipline. It will reduce the impact of chemical products and industrial processes on the environment and human health. Universal Wiser Publisher is pleased to announce the launch of a new journal—*Universal Journal of Green Chemistry*.

*Universal Journal of Green Chemistry* is an international, peer-reviewed, open access journal, published biannually online by Universal Wiser Publisher. The Journal is aimed to provide a digital forum for researchers and experts to publish all the latest and outstanding studies in the field of green chemistry.

We would like to introduce Prof. György Keglevich who accepted our invitation to serve as the Editor-in-Chief of *Universal Journal of Green Chemistry*. Additionally, we also would like to extend a warm welcome to all of our Editorial Board Members. As with all of Universal Wiser Publisher's open access journals, we will maintain a fast and rigorous peer-review process for this new journal. We hope that you will enjoy publishing with us.
