Nanoscience is an emerging area of science which involves the study of materials on an ultra-small scale and the novel properties that these materials demonstrate. Universal Wiser Publisher [1] is pleased to announce the launch of a new journal—*Universal Journal of Nanoscience* [2].

Universal Journal of Nanoscience (UJN) is an international, peer-reviewed, open access journal. UJN provides an advance forum for the nanoscience and nanotechnology research at the interfaces of chemistry, biology, medicine, materials science, physics, and engineering. The experimental details must be fully documented and the results reliably reproduced.

Areas of interest include, but are not limited to:

- nanomaterials
- nanomedicine
- nanoelectronics
- nanostructures
- nanotechnology
- nanometrology
- applied nanoscience
- computation of nanoscience

As with all of Universal Wiser Publisher's open access journals, we strive to provide excellent service as well as a fast and rigorous peer review process. We hope that you will enjoy publishing with us.

Conflicts of interest

There is no conflict of interest for this study.
